

Birch

Natural Birch is a medium density hardwood with a fine, moderate grain pattern that ranges from straight to wavy or curly. The predominant sapwood color is white to creamy yellow, while the heartwood varies in color from medium or dark brown to reddish brown which may result in color variation within the same door. This range in color makes a distinctive statement in your Birch cabinetry selection.

Rustic Birch

Natural Birch is a medium density hardwood with a fine, moderate grain pattern that ranges from straight to wavy or curly. The predominant sapwood color is white to creamy yellow, while the heartwood varies in color from medium or dark brown to reddish brown which may result in color variation within the same door. Rustic Birch may include some combination of open knots, wormholes and mineral streaks reflecting the inherent beauty of the natural characteristics of wood.

Cherry

Cherry is a rich, multi-colored hardwood, often used in fine furniture. In its raw state, cherry has pinkish-brown hues with occasional shades of white, green, pink or grey. Small gum pockets, streaks, pin knots and figures are common wood characteristics. Natural or light stains accent the color variations in cherry, while very dark stains soften its complexity. All cherry wood naturally darkens or "mellows" with age.

Quartersawn Cherry

Cherry is a rich, multi-colored hardwood, often used in fine furniture. In its raw state, cherry has pinkish-brown hues with occasional shades of white, green, pink or grey. Small gum pockets, streaks, pin knots and figures are common wood characteristics. Natural or light stains accent the color variations in cherry, while very dark stains soften its complexity. All cherry wood naturally darkens or "mellows" with age. Quartersawn refers to the method of cutting the Cherry. Boards are cut through the radius of the rings allowing wavy grain and flaked patterns to show on the face.

Rustic cherry may include some combination of open knots, wormholes and mineral streaks reflecting the inherent beauty of the natural characteristics of wood.

Hickory

Hickory is a strong, open-grained wood that is known for its flowing grain pattern and dramatic variation in color. Hickory often contains random pecks, burls and mineral streaks. A single hickory door might vary from light to deep brown when finished in light or natural stains. Darker stains will mildly tone these color variations, but these very characteristics make each hickory kitchen or bath unique.

Maple

Maple is a strong wood that is primarily off-white in its raw state. However, maple sometimes contains light hues of yellow-brown and pink as well as light tan or reddish-tinged streaks that darken with stain. Typically straight-grained, maple can be wavy or even curly. Hard maple offers more uniformity than other wood types, making it ideal for living spaces that feature a clean, streamlined appearance.

Quartersawn Maple

Quartersawn refers to the method of cutting the Maple. Boards are cut through the radius of the rings allowing wavy grain and flaked patterns to show on the face.

Oak

Oak has a prominent, open grain ranging in color from white, to yellow, to reddish brown. Sometimes streaked with green, yellow or black mineral deposits, red oak's strong grain often varies from closely knit to a distinctive, sweeping arch pattern.
